Designed and developed a responsive personal website showcasing skills and projects.

CERTIFICATES

Kotlin Programming Fundamentals (Dicoding) | [CERTIFICATE](#)

June 2023

- Gained a solid foundation in Kotlin's core syntax, including variables, data types, and control flow structures (if/else, when, for/while loops).
- Explored object-oriented principles (classes, objects, inheritance) and Kotlin's unique features (null safety, lambdas) to write clean, concise, and robust applications.

Introduction to Front-End Development (Meta) | [CERTIFICATE](#)

March 2023

- Developed hands-on skills in HTML, CSS, and JavaScript, enabling the creation of dynamic, responsive, and accessible web pages.
- Applied web development fundamentals through practical projects, emphasizing semantic markup, interactive user experiences, and debugging techniques.
